Frontier Mobile
Only from DH Systems

Introduction

Established in 1997, DH Systems is the leading provider of complete computer solutions for the vehicle salvage and vehicle dismantling industries in the UK. Our core products are Frontier Vehicle Salvage and Frontier Vehicle Dismantling.

Salvage manages your vehicles from uplift request to vehicle sale and Dismantling is the full sales and stock control system for your parts with registration number to manufacturer part number matching fully integrated into the desktop.

Complementing our core systems are a number of desktop, mobile and web solutions which both enhance the speed and efficiency of managing your yard and build stronger engagement from your website and customer base. Our latest dashboard keeps you up to date minute by minute, reporting on various data points - viewable anywhere in the world at any time over the internet.
We seamlessly connect with ebay, your website, PartShark, and other dismantlers allowing easy intertrading. PartShark is your public facing parts portal, all searchable by registration number. Quickly find matching parts and breakers online, the right part first time, while your customers can use buy it now with PayPal.

Complete Solutions

Fs Frontier Vehicle Salvage is our core salvage management system that handles everything from insurance related contracts and private collections through to selling and disposal. The salvage system is designed to make it as quick and easy as possible to process vehicles.

- **REG LOOKUP** Registration lookup loads cleansed vehicle data including engine codes
- Electronic import of uplifts and clearances
- **Fr** Frontier Recovery - send uplifts to your drivers phone, once recovered the images and vehicle details are returned over cell data and immediately available in Frontier
- CODs raised directly from the desktop system with one click
- **Fs** Frontier Signature - quickly capture signatures when selling vehicles
- **F))** Frontier Mobile - wirelessly take images and video and locate vehicles
- Experian check vehicles for outstanding finance, theft, category and plate changes
- CAP vehicle pricing for estimating vehicle values
- Post vehicle details to facebook and twitter
- Send vehicles directly to SalvageMarket and import sales
- **Fs** ScreenShark - show vehicles for sale in your reception areas
- **Fd** DataShark - show your current volumes and performance
- **Fc** Txt Msg - Send SMS messages directly or batch messages meeting certain criteria

FD Frontier Vehicle Dismantling is our core parts and stock control system. When a vehicle is added, the system matches the manufacturer part numbers to the vehicle derivative immediately showing you the previous sales and search history, giving you a sales forecast before you begin dismantling the first part.

Using Frontier Mobile and this information you can assess the vehicle and add the sellable parts into stock with photos and videos along with pricing and grading information - all on the App.

These parts are then available immediately for searching and sale, including uploading to your website, PartShark and listing on ebay. Dismantling is also your all in one ordering and invoicing system, handles customer requests and records payments. You can quickly reach a larger audience with our ebay approved module that simplifies the listings of parts onto ebay directly, all managed through Frontier.

Our ebay compatible application - built into Dismantling - supports ebay business profiles for shipping, returns and payments, ebay promotions, the latest responsive templates, direct bulk editing of items, correct item specifics for each part, new and used condition descriptions, videos on ebay, and all images are now sent to the ebay gallery. Dismantling directly communicates with ebay continually updating sold and paid items from ebay to Frontier and updates ebay with despatch information from Frontier.

- Manufacturer part numbers fully integrated into Frontier Dismantling
- Forecast potential sales for each vehicle loaded into the system
- **REG LOOKUP** Quickly search any vehicle with registration number to manufacturer part number matching
- Additional sales - find more parts that fit with automatic cross-matching of part numbers and factor numbers
- **euro CAR PARTS** Links with Euro Car Parts - live ECP stock check and ordering from the desktop
- **ebay** ebay module - fully integrate your ebay with Frontier
- **Fc Fsd Fsp** Send jobs to Touch Screen Dismantling and Touch Screen Packaging and manage jobs with Frontier Dashboard
- **Fd** DataShark - view company performance data, compare and analyse with built in graphs
- PartShark - easily list your parts on PartShark and your own website
- **Fs** Frontier Signature - Capture signatures when selling parts at the counter
- **F))** Frontier Mobile - add parts, prices, take photos and videos, stock check, locate vehicle anywhere in your premises
- **ez route** EZ-Route - efficiently plan, organise and schedule van deliveries with real-time tracking, feedback and proof of delivery

eZ parts Our brand new complete solution for your self-service yard utilising a simple touch screen interface, works with or without Frontier Dismantling.

- Easily and simply log customers arriving on site
- Capture customer images and bill them for entry
- Log customers departing
- Print RFID cards with customer image
- Simple fixed price billing for parts
- Simple to add warranties to orders
- Simple payment methods with admin fees
- Works with receipt printers & cash drawers

F)) Frontier Mobile is our all in one Android App, simplifying the processing vehicles and parts. You can run multiple devices at the same time, all devices PIN protected and required login.

- Bluetooth barcode scanner compatible, or scan barcodes through the device camera
- Add parts - processes a vehicle, select a matrix based on your preference
- Add images and videos, view previous pricing information, set prices, grading and notes
- Locate parts - put dismantled parts into stock with a shelf location
- Stock checking and part/label scanning - shows information about parts and locations
- Vehicle search - locate a vehicle in the yard by reg/ref/stock number and relocate it
- Depollute - add a custom list of depollution tasks and record the processes
- Assessments - perform vehicle assessments on demand with user defined checklists

Frontier Recovery

Bluetooth Barcode Scanner

WWW We power many of the leading vehicle auction sites and design, build and host many vehicle salvage, parts and breaking sites. One of our most popular features is the online Sell My Car page.

SELL MY CAR Sell My Car is a fully customisable website that offers your customers online prices for ELVs and car sales. CAP pricing is also available in Sell My Car, and can be configured to offer a better price for newer vehicles. The system will calculate the real value of a vehicle based on the mileage and condition and offer the price to your customer, for older vehicles the weight and scrap metal prices are used. SMC calculates the distance between your depot and the customers location to offer either collection or drop-off. You can set the values in the management pages. A customer can accept, reject or abandon the quote and the system will allow you to chase potential purchases and remind visiting customers to return to complete their sale. Purchases are electronically imported directly into Frontier Vehicle Salvage.

Fv Frontier VISTA is an online portal designed for insurance companies, councils and other organisations to enter uplift and clearance information. Engineers can log in and assess vehicles directly. Vehicle data is passed to and from Frontier automatically and both ends are constantly updated with the latest information. VISTA dramatically simplifies your relationship with other organisations.

Frontier Vehicle Salvage
dh.vu/fs
Our complete salvage system that handles everything from uplifts through to selling, auctioning or disposal of vehicles, including insurance contracts.

Frontier Vehicle Dismantling
dh.vu/fd
Our complete stock control and invoicing system fully integrated with manufacturer part numbers. Reg search, sales, invoicing, ebay, web listings, it does it all.
